About me

Last year I completed my training as a junior frontend developer alongside my school education. At the Developer Akademie, I built professional web applications using JavaScript & Angular. You're welcome to visit my [portfolio](#). Following my training, I explored backend development and gained experience working with Django. To continuously improve my programming skills, I am always on the lookout for interesting projects and job opportunities on the market.

My latest projects

- **Task Management Web-App**
for organizing multiple users
- **Chat-Messenger Application** in the style
of Slack for team communication
- **Object-oriented programming** of a web
browser game

Tech Stack

- **JavaScript**, TypeScript, Python
- **Angular**, Django, React Native, Material
Design
- HTML, CSS, SCSS, Bootstrap, Tailwind

Personal Skills

- **Solution-oriented thinking**
I have developed solution-oriented skills as a frontend developer, which allows me to come up with innovative and intelligent ideas to fix bugs and start new projects.
- **Goal-oriented**
By completing my training as a frontend developer alongside my school education I was able to get acquainted with good time management. I pursue my passion for coding with a determined focus, taking joy in creative tasks.
- **Structured working**
In team and solo projects, I learned how to plan and organize new projects. I also improved my communication skills in a team for more successful project results.
